DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al (JP 2001144019).**

Suzuki et al disclose a thermal processing unit comprising a holder for plurality of substrates (Fig 1-23), reaction container (2), process gas supplying mechanism (41,42,43,44,45 and 46), heating mechanism (31-36) and a controller which controls each gas circuit and each heating mechanism independently from each other according to a recipe which controls gas flows and heating power. Suzuki further teaches that a recipe for a certain process rate is modified depending upon the number of substrates in the batch so that dummy wafers may not be needed to fill empty slots.
